Kalimba tab drafts: readiness for the main dataset

107 songs whose draft has been compared with Arup Paul's piano roll. Sorted by tier, then by score = roll match − 3×bad-note % − 4×retuned tines (+5 if the notes come from a MIDI).

Tier A: bad notes ≤2%, at most 1 retuned tine, roll match ≥94%. **B**: bad notes ≤5%, ≤2 retunes, roll match ≥87%. **C**: the rest. **?**: the ktab was edited after conversion, so retunes and bad notes could not be recomputed. **Roll match**: share of the draft's notes Arup Paul's roll plays in order (11 older MIDI drafts: stanza-by-stanza check). **Bad notes**: notes with no tine, played a semitone off. **Scale**: the note the draft puts Sa on (the kalimba is tuned in C).

#	Song	id	MIDI	Swaralipi	Roll	Scale	Tines retuned	Bad notes	Tier
